Symbiosis as a success model

Combining the best of two worlds – that's how to describe the joint development of new solutions at Fronius. The areas of hardware and software development are so closely linked that they are in constant exchange with each other.

Come and join us on November 22nd and be impressed by these two Fronius worlds. We start with a manufacturing tour in Sattledt. Next stop is our RnD site in Thalheim, where our developers wait for you with six exciting workshop topics. The choice is yours: Depending on your area of interest, you can take part in two of them.

Wednesday, 22/11/2023	
12:30	Lunch at Fronius Sattledt
13:30	Manufacturing tour in Sattledt (1 group DE, 1 group EN)
14:30	Bus transfer to Thalheim
15:00	Opening & pitches for workshops
15:30	First workshop session (1st choice)
16:15	Second workshop session (2nd choice)
17:00	Q&A, Networking
17:30	Closing

Snacks & drinks & cool goodies

Monday
22/11/2023

Location
Sattledt &
Thalheim,
Austria

Please see workshop
topics attached

#1   **(DE) Design meets function**

Bei Mobile Apps und Webapplikationen treffen Design und Funktion aufeinander. Erst durch ein intuitives User Interface werden unsere digitalen Services für Kunden nutzbar.

#2   **(EN) Sharpen the Axe! An adventure journey about testing and test-tooling in the field of embedded and cloud.**

Main stops of the journey are: the image of software testing, software testing at Fronius and sightseeing of our test infrastructure.

#3   **(EN) Discover the future with Fronius and AI.**

Experience efficient energy usage, predictive maintenance and optimized quality control – propelling us towards an electrifyingly sustainable tomorrow.

#4   **(EN) Next Stop: Treat IT-operations as a Software-Problem.**

Your challenge in this workshop: Create ideas, how coding can help us in realizing self-healing services.

#5   **(EN) Full stack thought differently:** printed circuit boards, final test systems, high level control, computer vision and more.

Everything necessary for developing the future of manufacturing software.

#6   **(EN) The Centerpice**

The symbiosis of hardware and software allows us to cast the ingenious ideas into our outstanding products and thereby ensure a more sustainable and livable world of tomorrow.
